## FoodBusiness ERP

Built to help food and beverage manufacturers, processors and distributors streamline operational efficiency and manage business growth.

### One System to Run your Business

FoodBusiness ERP provides end-to-end management of your entire food and beverage business. From the time an ingredient or material enters your facility, until the finished good is delivered to your customer, FoodBusiness ERP is there to help manage your operations every step of the way.

By connecting departments, data and operational processes into a single solution like FoodBusiness ERP, you'll have access to a single version of the truth, giving you complete visibility into business performance and providing you with the data you need to make the most accurate business decisions.

### Purpose-Built for Food and Beverage Companies

FoodBusiness ERP is built on Sage X3 and combines the robust capabilities of Sage X3's powerful enterprise platform with industry-specific functionality built for food and beverage companies.

Features including end-to-end traceability, MRP, robust pricing capabilities and product recall management give food and beverage companies like yours the tools they need to streamline operations and manage business growth.

### Delivered by Industry Experts

FoodBusiness ERP is designed, delivered and supported by NexTec Group, experts with over 25 years of experience delivering software solutions to hundreds of companies.

Our experts come from food and beverage manufacturing and distribution companies, so we understand the complexities of running a successful food and beverage business. From design and implementation, to training, go-live and beyond, our consultants will be there providing you with the support you need to grow your business.

# How It Works

Accurately trace from receiving through to delivery

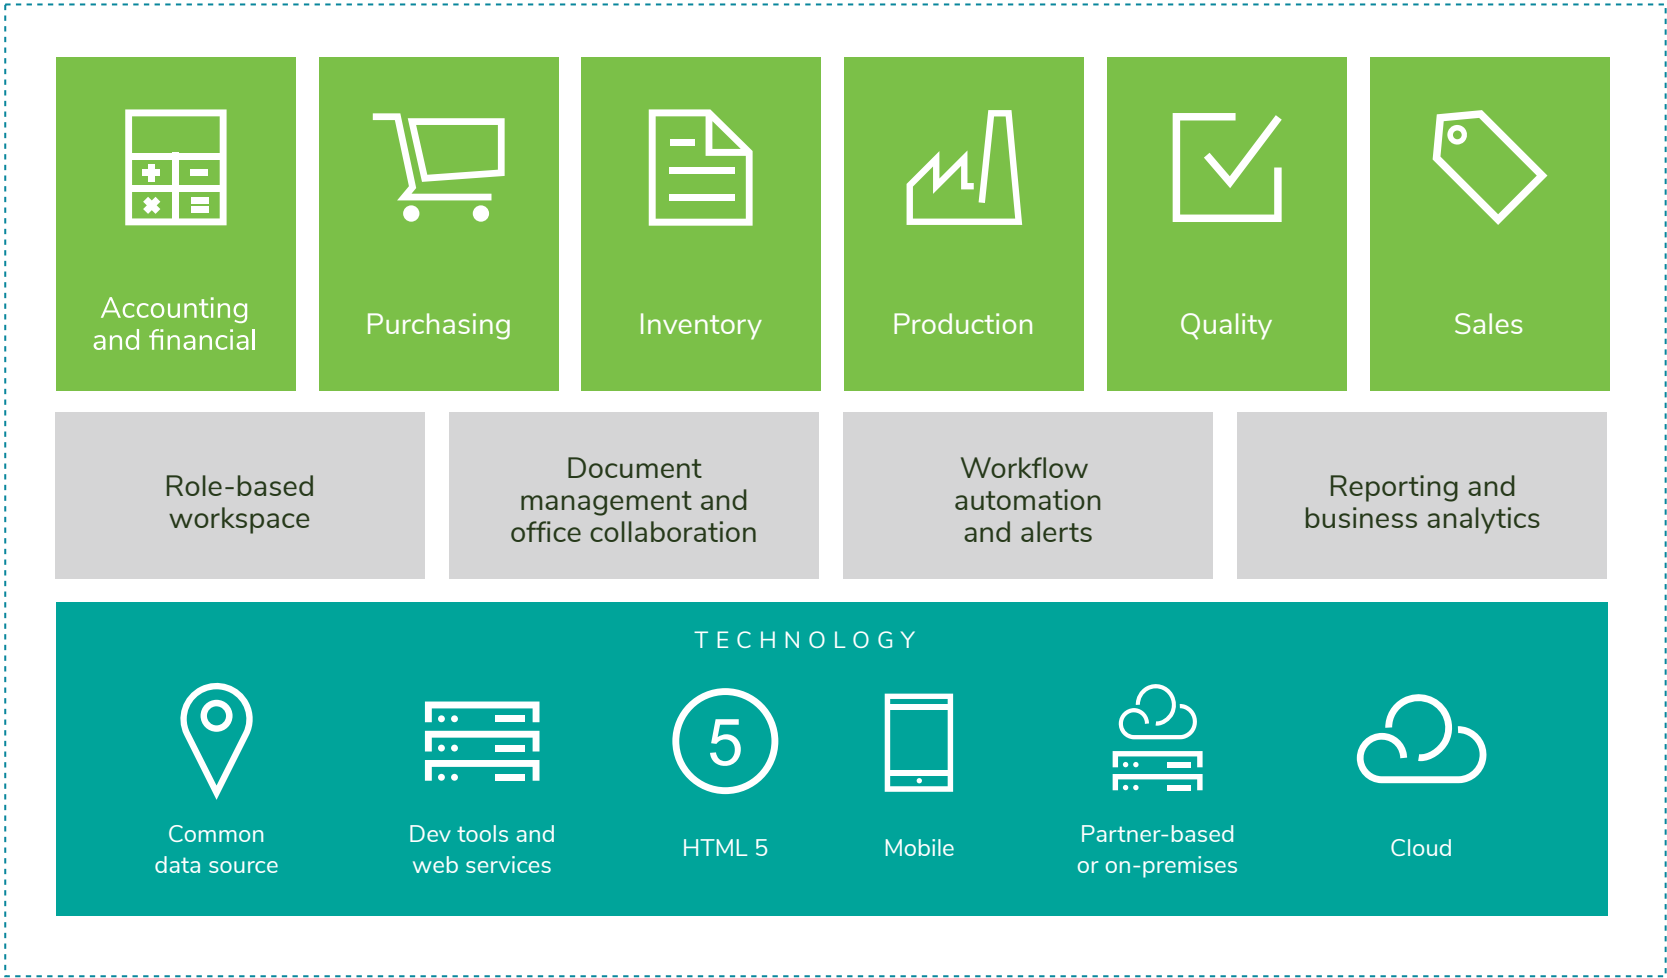

Gain control and visibility throughout the production process

Support certification standards with comprehensive quality and product recall management

Manage and analyze production costs

Analyze data using dashboards, KPIs and alert reporting

## FoodBusiness ERP Core Business Management Applications and Technology

# Features

## Finance and Operations

- Manage multi-company finance and operations from a single system.
- Make better business decisions with access to key metrics, dashboards, issue alerts and audit reports.
- Track costs to better understand which product lines are most profitable and adjust accordingly.

## Quality and Compliance

- Support your GMP, HACCP, SQF and BRCGS compliance standards.
- Integrate quality control for inspections to assure conformance to specifications.
- Ensure safety with full lot/serial traceability, product recall management and comprehensive allergen tracking.

## Production

- Make better decisions about production with real-time access to operational and financial insights.
- Simplify production scheduling and minimize production line setup.
- Improve operational efficiency and reduce production waste.

## Purchasing and Sales

- Better manage customers, suppliers and alternate suppliers from a single platform.
- Optimize and manage complex pricelists based on a number of variables.
- Streamline planning, scheduling and inventory processes with multi-site Material Requirements Planning (MRP) functionality.

## Distribution and Inventory

- Manage multi-site operations and improve inventory management.
- Gain visibility into inventory valuation with multiple costing options.
- Monitor inventory levels and expiry dates to better manage waste.
